

Feature:

1. Long-distance transmission, the voice transmission distance can reach 500 meters, and the warning sound can reach 1000 meters (depending on the influence of the wind direction of the use environment).
2. The maximum sound pressure level of the warning tone at 1 meter can reach 144dB, and the maximum sound pressure level of the voice can reach 135dB
3. Use NdFeB magnets as permanent magnet materials to produce high sound pressure, medium and high frequency drive heads with high performance
4. High-quality audio transformer made of annealed iron core and oxygen-free copper, with low distortion and better effect
5. Supports mobile lifting tripod installation or fixed installation, with built-in angle-adjustable bracket
6. Waterproof and dustproof levels comply with IP66 standards
7. Made of fiberglass composite material, sturdy and durable, suitable for outdoor installation and use

Specification:

Power	200W
Constant voltage input	100V
Characteristic sensitivity level	111dB
Frequency response Hz	350Hz-4KHz
Maximum sound pressure level	144dB±3dB
Coverage angle (H°XV°)	30°X40°
Appearance size	430x460x510mm
Installation form	special supporting bracket installation
Decorative materials	fiberglass composite materials
Net weight	19.5kg
