

Feature:

1. FT-CEBK is a computer broadcast control software that can realize the multimedia control of each computer in network management, including screen playback, pause, switching to the previous and next songs, PPT presentation, page turning, computer startup and shutdown and other functions
2. This software needs to be installed on the computer host used for playback
3. This software can play video and audio files stored in the hard disk of this computer, and can also show pictures and PPT files. Supports video and audio playback, pause, previous song and next song and other functions, and supports PPT page browsing
4. The above functions can be controlled by sending commands to the computer where the software is installed through the network control host
5. Supports scheduled tasks: when playing video and audio files, when the specified progress is reached, send network instructions to the specified IP (used to match the network control host to trigger the execution of scene commands)
6. Supported video formats: MP4, WMV, MOV, MKV, AVI
7. Supported audio formats: MP3, WAV, WMA, FLAC, etc.
8. Supported image formats: JPG, JPEG, PNG
