

Feature:

1. 32*32 bidirectional audio channels, controllable via CAT5.
2. Use standard, off-the-shelf computer network equipment.
3. Automatically discover and automatically configure IP addresses.
4. Easy to add, name, remove, and adjust devices.
5. Dante-supported devices are very rich and diverse.
6. Secondary ports for redundant network options.
7. Sampling rate accurate playback synchronization.
8. Extremely low latency.
9. Gigabit ports.
10. Dante controller software can be used to set up the network.
