

Feature:

1. Arc contour design, fashionable appearance, beautiful shape
2. Adopt high and low frequency split phase reflex tube design, so that the box weight bass is quite outstanding, making the sound more powerful
3. The shell is made of ABS anti-UV material, safe and reliable, thickened shell can reduce resonance, durable and non-fading, anti-oxidation
4. Bass unit PP + rubber edge bass unit, 80mmY35 external magnetic design, bass diaphragm is made of polypropylene material, making the bass more powerful
5. Tweeter PET diaphragm design, tweeter diaphragm is made of natural silk membrane. High-strength plastic horn makes the sound clear, round and transparent, clear and bright
6. The grille is made of 1060 pure aluminum, which has been hardened and anti-oxidation treated. It is not easy to deform and never rust
7. The mounting bracket is designed with adjustable angle, and the bracket can be installed vertically and tilted
8. E-type wire turn audio transformer ensures audio output fidelity, sufficient power, high efficiency, and efficiency can reach 90%

Specification:

Speaker unit	1×1, 4×1
Rated power	20W
Optional power	2.5W/5W/10W/20W/8 ohms
Input voltage	100V
Sensitivity (1m, 1W)	90±2dB
Frequency response	100-20kHz
