

Feature:

1. Outdoor-ready, environmentally friendly, waterproof, and simulated design, featuring an outdoor waterproof coaxial driver and aluminum grille.
2. The enclosure is constructed from a one-piece aluminum alloy, offering excellent waterproof, sturdy, and durable features.
3. The front grille is treated with an aluminum surface for corrosion and rust prevention, and the sound outlet provides 360-degree sound transmission.
4. The speaker unit features a 6.5-inch woofer and a 0.75-inch tweeter in a waterproof, coaxial design, delivering excellent bass and treble, resulting in a rich, rounded, and clear sound.
5. The E-type wire-turn audio transformer ensures high audio output fidelity, high power, and high efficiency, reaching up to 90%.

Specification:

Waterproof rating	IP65
Rated power	25W
Input voltage	70/100V
Sensitivity	89dB
Mounting dimensions	130mm
Product dimensions	200*750mm
