

Feature:

1. Outdoor-ready, environmentally friendly, waterproof, simulated design featuring outdoor-grade full-range drivers and an aluminum grille
2. Enclosure: Molded from a single piece of environmentally friendly, green resin. This pure natural resin is corrosion-resistant, sulfur-resistant, waterproof, and durable, with an average thickness of 12mm
3. Grille: The front is aluminum with a corrosion- and rust-resistant finish, and the large sound outlet ensures maximum sound transmission
4. Speaker: A 5-inch, full-range waterproof driver
5. E-type wire-turn audio transformer: Ensures audio output fidelity, high power, and high efficiency, reaching up to 90%

Specification:

Waterproof rating	IP65
speaker drivers	5"×1
Rated power	20W
Power options	5W/10W
Input voltage	100V
Sensitivity (1m, 1W)	88dB
Frequency response	100-18kHz
Dimensions	200×210×210mm
Weight	3.0kg
