

Feature:

1. Outdoor-ready, environmentally friendly, waterproof, simulated design featuring an outdoor waterproof coaxial driver and aluminum grille
2. Enclosure: Made of fiberglass, waterproof and durable
3. Grille: Aluminum front for corrosion and rust resistance. Large sound outlet for maximum sound quality
4. 5.5-inch waterproof speaker unit: Excellent balance of high and low frequencies, resulting in a rich, rounded, and clear sound
5. E-type wire-turn audio transformer: Ensures audio output fidelity, high power, and high efficiency, reaching up to 90%

Specification:

| | |
|----------------------|---------------|
| waterproof rating | IP65 |
| speaker | 5.5 |
| Rated power | 30W |
| Power options | 20W/30W |
| Input voltage | 70V/120V |
| Sensitivity (1m, 1W) | 89dB |
| Maximum SPL (1m) | 98dB ± 2dB |
| Frequency response | 80-16kHz |
| Dimensions (H×W×L) | 270*270*450mm |
