

Feature:

1. Outdoor-ready, environmentally friendly, waterproof, simulated design featuring an outdoor waterproof coaxial driver and aluminum grille
2. Enclosure: Made of fiberglass, waterproof and durable
3. Grille: Aluminum front for corrosion and rust resistance. Large sound outlet for maximum sound quality
4. 6.5-inch waterproof speaker unit: Excellent balance of high and low frequencies, resulting in a rich, rounded, and clear sound
5. E-type wire-turn audio transformer: Ensures audio output fidelity, high power, and high efficiency, reaching up to 90%

Specification:

waterproof rating	IP65
speaker	6.5
Rated power	40W
power options	30W/40W
Input voltage	70V/110V
Sensitivity (1m, 1W)	89dB
Maximum SPL (1m)	98dB ± 2dB
Frequency response	80-16kHz
Dimensions (H×W×L)	335*200*242mm
