

Feature:

1. Aluminum alloy housing with off-white paint for a stylish look
2. Woofer: PET diaphragm, 100mm Y30 external magnet, and polypropylene diaphragm for powerful bass
3. Tweeter: Square horn design, natural silk diaphragm. High-strength plastic horn for a crisp, clear, and bright sound
4. All-aluminum housing with a matte off-white paint finish for safety, reliability, durability, and durability. Low resonance noise
5. Grille: 1060 pure aluminum, hardened and anti-oxidation treated for excellent deformation and rust resistance
6. Front panel: 10mm PE wood-plastic composite. The board remains resistant to water damage and swells, offering exceptional strength and effectively preventing front panel resonance, cracking, and aging
7. High-quality transformer, an E-type wire-turn audio transformer, ensures audio output fidelity, high power, and high efficiency, reaching up to 90%
8. A two-stage crossover design divides the audio signal into low-mid and high-frequency components, each fed into its own dedicated audio driver for distinct sound levels

Specification:

Waterproof rating	IP65
Speaker units	8×3, 4×1
Rated power	120W
Power options	60W/120W
Input voltage	70V/100V
Sensitivity (1m, 1W)	93dB
Frequency response	80-18kHz
