

► Feature:

1. This device is used for lightning protection, overvoltage protection, and leakage protection in broadcast systems
2. 4-channel input and output on/off control
3. Clear normal operation and fault protection indication
4. Number of channels: 1-4, selectable

► Specification:

Input capacity	70-200V, 20A per channel (power input)
Output capacity	70-200V, 20A per channel (power input)
Overvoltage protection threshold voltage	350V
Rated discharge impulse current (Iimp (8/20) μs)	Peak current 30kA
Leakage protection current	≥10mA
Alarm output level	0V (short circuit)
Local protection	AC fuse
Power supply	AC 220-240V/50-60Hz
Dimensions	484*365*88mm
