

Feature:

1. The waterproof network aluminum horn terminal is a fully digital analog-to-digital signal processor based on the TCP/IP transmission protocol. Intelligently controlled by the main control system, it can play background programs, emergency paging, alarm signals, and more from the main control system
2. Fully digital design, high fidelity, and excellent voice transmission performance
3. Built-in 30W high-quality digital amplifier with low power consumption
4. Highly reliable design with a long lifespan, with a mean time between failures (MTBF) > 100,000 hours
5. Can receive emergency paging calls independently of the server, with the volume automatically adjusting to the set value
6. Can be linked to a camera for real-time viewing of camera feeds via the host software
7. Supports DHCP and static IP network modes; supports AUTO IP, automatically switching to a temporary IP if no IP address is obtained in DHCP mode
8. Supports automatic standby mode for energy-saving operation when no music signal (including local audio) is present

Specification:

Rated Power	30W
Input Voltage	DC16-24V 2A
Sensitivity (1m, 1W)	107±3dB
Frequency response	350-6.5kHz
Operating temperature	-20°C to +60°C
Waterproof rating	IP66
Dimensions	Φ246 × 292mm
Net weight	1.9kg
