

Network time regulator FP6-P3503

Feature:

- 1. High-grade aluminum alloy design
- 2. 1.9-inch full-color display showing IP address, time, and more
- 3. Button-operated design allows for setting IP address, time, and screen-off timer
- 4. Supports GPS and BeiDou (BD) satellite time synchronization
- 5. Ultra-high-precision GPS time synchronization, with a clock error of less than 1ms
- 6. High-precision internal compensation method further ensures clock accuracy
- 7. Network communication function, capable of sending time data to synchronize with IP broadcast servers
- 8. Customizable time periods for time synchronization, including multiple synchronizations per day
- 9. Supports RS485 communication protocol

Specification:

Network Interface	Standard RJ45 Input
Transmission Rate	100Mbps
Power Input	DC16-24V/2A
Operating Temperature	-20°C to +60°C
Power Consumption	20W
Dimensions	482×300×44mm
Net Weight	2.7kg
