

Feature:

1. AdoptU-band adjustable frequency solution to improve the flexibility of use
2. AdoptUHF high-performance integrated circuit design, stable and reliable
3. Visual high-definition screen display, which can display working frequency, channel, battery power,RF/AF signal and other
4. contents
5. Metal hand-held texture, ergonomic design, streamlined appearance processing, better fitthe hand curve, comfortable grip
6. Each channel has the function ofindependent manual selection of spectrum frequency points
7. One-key infrared frequency setting, multiple transmitters can be selected and interchanged, simple operation
8. Digitalfrequency locking technology, super anti-interference ability

Specification:

Parameter	Specification
RF Range	640.00-690.00MHz
Bandwidth	30MHz per channel
Modulation Mode	FM Frequency Modulation
Frequency Matching Mode	Infrared Automatic Frequency Matching
Number of Channels	200 Channels
Noise Suppression Mode	Automatic Noise Detection and Digital ID Code
Deviation	45KHz
Dynamic Range	110dB
Frequency Response	60Hz-18KHz
Antenna Interface	BNC/50Ω × 2
Output Interface	1 × Unbalanced φ6.35mm Interface
	2 × Independent Balanced XLR Interfaces
Power Supply	DC 12V 600mA
Dimensions (L×D×H)	420×180×45mm
